

PROFESSIONAL SUMMARY

Computer Science Engineer (CGPA: 9.19) with professional experience as a Full Stack Developer at TCS, building enterprise applications using React.js and Spring Boot. Skilled in designing responsive web interfaces, implementing secure authentication and session management, building REST APIs and controller classes, and resolving production issues. Proficient in Java, Spring Boot, Microservices, and PostgreSQL. Strong foundation in Machine Learning, Python, and Data Structures & Algorithms with hands-on experience delivering scalable applications.

EDUCATION

•VIT - AP University2021-2025

Bachelor of Technology in Computer Science and EngineeringCGPA: 9.19

EXPERIENCE

•Tata Consultancy Services (TCS) | Full Stack DeveloperDec 2025 – Present

– Developed and enhanced 10+ responsive enterprise web pages using React.js and Spring Boot, implementing reusable UI components, form validations, and ensuring cross-browser compatibility.

– Implemented secure authentication, session management, and role-based access control (RBAC) for 1,000+ users, strengthening application security and preventing unauthorized access.

– Engineered 15+ RESTful APIs and Spring Boot controller classes, integrated PostgreSQL for efficient data management, and resolved 40+ production defects to improve application stability and performance.

– Technologies: Java, Spring Boot, React.js, PostgreSQL, REST APIs, Git

TECHNICAL SKILLS AND INTERESTS

- Programming Languages: Java, Python, JavaScript
- Full-Stack & Backend Frameworks: React.js, Node.js, Express.js, Spring Boot, Tailwind CSS
- Databases & Storage: PostgreSQL, MySQL, MongoDB
- Developer Tools & Platforms: Git, GitHub, Docker, Postman, IntelliJ IDEA
- Areas of Interest: Full-Stack Development, Machine Learning, Data Science
- Competitive Programming: LeetCode (1662), GeeksforGeeks (1352), CodeChef (1300)

PERSONAL PROJECTS

- TripVerseLink

* Engineered and deployed a scalable full-stack travel booking platform supporting flight and hotel search, comparison, and booking for 10+ active users.

* Developed 25+ secure REST APIs using Java Spring Boot with JWT-based authentication and role-based access control.

* Optimized PostgreSQL queries and backend APIs, improving search and booking response time by 40%.

* Technologies Used: Java, Spring Boot, PostgreSQL, JWT, REST APIs, React.js, TypeScript, Tailwind CSS
- Fit-FusionLink

* Designed and deployed a full-stack fitness platform generating personalized workout plans based on user goals, BMI, and activity data for 10+ users.

* Trained a machine learning recommendation engine in Python using Random Forest to personalize workout and nutrition suggestions.

* Implemented secure JWT-based authentication and daily progress tracking to improve user engagement and consistency.

* Technologies Used: Java, Spring Boot, PostgreSQL, JWT, REST APIs, React.js, TypeScript, Tailwind CSS, Python, Scikit-learn

ACHIEVEMENTS

- Secured 1st Place in the VIT-AURA Codeathon conducted by the Placement Department, VIT-AP University.
- Earned 1st Place in CSI’s “Snakes and Coders” Codeathon at VIT-AP University.
- Achieved 3rd Place at VIT-AP University’s TechSprint Entrepreneurship Event for developing an analytics-driven strategy concept to enhance team performance in the IPL tournament.

CERTIFICATIONS

- SmartInternz – Applications of Artificial Intelligence, Machine Learning, and Applied Data Science.
- Ethunus – MERN Full Stack
